

METAL CERA

Self-polishing, metallic wax

REV. 3/06-06-2016

USE

After having dewaxed the floor with DETER DECERANTE and left it to dry thoroughly, spread METAL CERA with a cloth or special applicator (do not pour directly onto the floor). It is best to wipe over the surface twice in both directions, leaving enough time for drying between each coat. Once the operation is complete, wait approximately 7-9 hours before opening the premises to traffic.

CAUTION: The product is not suitable for icy conditions. Do not use on unpainted wood or parquet floors.

PHYSICAL-CHEMICAL CHARACTERISTICS

Chemical classification	Anionic/non-ionic emulsion
Physical state	Liquid
Color	Milky
pH	8,5 ± 1
Density	1,030 ± 0,020 g/ml

Refer to the safety data sheet for hazard information and precautions.

USAGE

The product is suitable for all kinds of synthetic or natural stone floors (excluding wood). Its special composition makes it resistant to footprints, dirt and detergents. METAL CERA is also an effective, long-lasting product with self-polishing power.
