

MACRO-LUX

Scented, protective treatment for car interiors in leather and faux leather

REV. 3/13-06-2016

AVAILABLE FORMAT

Item	Format
200759	kg 5
200760	kg 10
200761	kg 26

USE

Shake thoroughly before use. Spray the product on a clean, soft cloth (such as PANNI LUX S.50) and apply over the parts to be treated. It is advisable to use the product on pre-washed and pre-dried surfaces.

CAUTION: Avoid spraying it directly on the skin. It is preferable to allow the parts to dry before using the car again. Given the many qualities of leathers and their treatments, it is advisable to carry out a preliminary test on a small, less visible area. Do not apply on surfaces that are excessively hot. Do not use on suede or Alcantara.

PHYSICAL-CHEMICAL CHARACTERISTICS

Chemical classification	Silicone solution
Physical state	Liquid
Solubility in water	In every ratio
Color	Milky yellow
pH	7 ± 1
Density	1,000 ± 0,020 g/ml

Refer to the safety data sheet for hazard information and precautions.

USAGE

It has been specifically designed for reconditioning leather, imitation leather and faux leather materials in vehicle interiors. Thanks to its innovative additives, it penetrates and nourishes various kinds of upholstery enhancing their natural colouring. The product also forms an invisible protective film that counteracts normal ageing of leather caused by UV rays and friction. During use, it releases a pleasant fragrance.
