

## LAVAMOQUETTE R18

**Scented sanitising detergent for fabrics**

### AVAILABLE FORMAT

Item	Format
200398	kg 10
220399	kg 26

REV. 9/23-06-2016

### USE

Dilute the product in water (preferably warm) from 15 to 30%, depending on the type of dirt to be removed, and pour the solution into the special tank. For best results, it is advisable to work in both directions (from top to bottom then bottom to top, from right to left then left to right). LAVAMOQUETTE R18 can also be used for manual cleaning at the same dilution as above; in this case proceed as follows: spray the product on the surface, spreading it with a damp sponge and working always in both directions. Leave to act for a few minutes and then vacuum the surface (again in both directions) using the special brush attachment.

### PHYSICAL-CHEMICAL CHARACTERISTICS

Chemical classification	Non-ionic solution
Physical state	Liquid
Solubility in water	In every ratio
Color	Straw yellow
pH	12 ± 1
Density	1,030 ± 0,020 g/ml

Refer to the safety data sheet for hazard information and precautions.

### USAGE

A low-foam detergent specially designed for washing fabric surfaces (car interiors, carpets, seat covers, etc.) with the help of extraction machines. Thanks to the substances it contains, LAVAMOQUETTE R18 cleanses and sanitises the surfaces being treated, while eliminating any organic residues and releasing a pleasant fragrance.
