

PULIGRES

Detergent specially formulated for porcelain stoneware

REV. 3/06-06-2016

USE

Dilute the product from 1:100 to 1:20 in water, depending on the degree of dirt and the type of use.

CAUTION: Do not apply the product on aluminium or its alloys.

PHYSICAL-CHEMICAL CHARACTERISTICS

Chemical classification	Alkaline solution
Physical state	Liquid
Solubility in water	In every ratio
pH	13 ± 1
Density	1,250 ± 0,020 g/ml

Refer to the safety data sheet for hazard information and precautions.

USAGE

PULIGRES is an alkaline-based product specially formulated for cleaning porcelain stoneware floors; it can be used with floor cleaning machines or simply with a mop. Its active ingredients rapidly remove stubborn grease and oily residues, without damaging the treated surfaces.

PULIGRES is particularly suitable for cleaning large floor surfaces such as in hypermarkets, supermarkets and companies... and in all settings where foam is not a requirement.
