4	VERY HARD >21	15g	30g	45g

### PHYSICAL-CHEMICAL CHARACTERISTICS

Chemical classification	Mixture of carbonates
Physical state	Powder
Solubility in water	In every ratio
Color	White with blue specks
pH	-
Density	-

Refer to the safety data sheet for hazard information and precautions.

### USAGE

A highly soluble powder detergent, suitable for any kind of white or coloured fabric and for natural, synthetic and mixed fibres. The active ingredients and enzymes it contains remove stains from grease, fat and grime in general, without altering the colours. During washing, the product releases a pleasant fragrance, without damaging the fibres of the fabrics being treated. Its formulation makes it suitable for use with both hard and soft water and in any kind of washing machine.
